Reasons for Allowance

1. Claims 1, 3-6, 8, 12, 14, 15, and 27 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claim 1 is directed to a multi-layer coating applied to a substrate wherein the coating reflects colored light and comprises: (a) an upper layer comprising a resinous binder and colorants which emit fluorescent light when exposed to visible light; the colorants being selected from dyes and pigments that will not scatter light that mask fluorescent light; the colorants being present in the upper layer in amounts of 0.001 to 50 weight percent; and (b) a lower layer comprising a resinous binder and light-absorbing particles, wherein said coating composition exposed to a first light level exhibits a first colored appearance that is dominated by absorbance of light by both of said colorants and said light-absorbing particles and wherein the coating composition exposed to a second light level of higher intensity than the first light level exhibits a second colored appearance dominated by fluorescent light emitted by said colorants, wherein the lower layer has a color value L^* less than 40.

The closest prior art, Babler, fails to disclose or render obvious a lower layer comprising a resinous binder and light absorbing particles which have a color value R^* less than 40 and an upper layer containing dyes and pigments which are present in amounts of 0.001 to 50% by weight.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
